

Fight Copy

Dear Customers:

Thanks for your attention to our product [PN532 NFC RFID module V3 kits -- NFC with Android phone](#).

Recently we found a factory in China copied our products illegally.

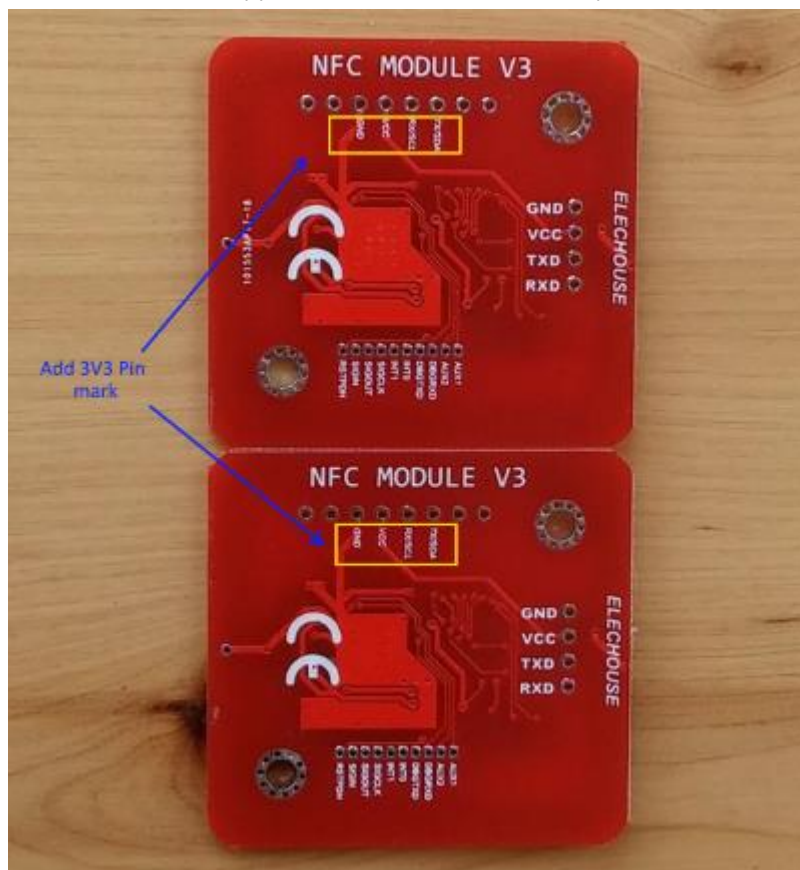

Information:

This company (深圳宏维电子有限公司) doesn't have an English name. According to our information, it is located in ShenZhen, China (深圳航苑大厦东座 1006). This company doesn't have any technique team. They declaimed that they have a factory in DongGuan and could produce at low price.

Recently we also received many feedback from customers. They reported the bad performance of our PN532 module. We found no reason. Finally we had to consider if there were copy versions in the market. From the information supplied by those customers, we found this company who copied our products. We also found that they copied many products from other companies.

We are preparing to fight against them with lawyers.

So far we did some appearance modification to our products.
